Hello there! I'm a Professional Front-end and Back-end Developer Expert. I have also completed my **B.Sc** in Computer Science and Information Systems. I've taken many (Modern Web Design and front-end and Back-end Web Development) lessons from famous institutions. My educational background helped me a lot to thrive in this career. I have created many fabulous and eye-catching websites, including Portfolio, Corporate, Development Tax, Blog / Magazine, Retail, Security Management, Education, Real estate, e-commerce, etc. My specialty is I can handle any **Project**.

WORK EXPERIENCE

Laravel Developer at [Mysoftheaven \(BD\) LTD.](#) Dhaka, Bangladesh.
Jul 2023 - Present

- Spearheading the development of web applications using the Laravel framework, I contribute to the entire software development lifecycle from conception to deployment.
- Working closely with front-end developers, I ensure smooth integration of user interfaces with server-side logic, delivering cohesive and feature-rich applications.
- I proactively troubleshoot and debug issues, optimizing performance and user experience for our applications.

Communication Officer at [Shikhbeshobai IT Limited](#), Dhaka
Aug 2022 - Apr 2023

- Maintained a database of media organizations and contacts within them.
- Regularly meet with and conduct interviews with media personnel.
- Create and produce internal newsletters for the organization.

Front-end Developer at [Startup Cumilla](#), Cumilla
Jan 2019 - Apr 2022

- Developed websites, mobile applications, and landing pages from concept through deployment.
- Standardized all output with a new, responsive, mobile-first approach and strategy.
- Collaborated with product team members to implement new feature developments.

PROJECTS & LIVE

- **Developed an E-commerce website (G-Tech):**

1. Collaborated with internal marketing team and a small team of developers to build custom websites.
2. Assist team members with various problem-solving.
3. Build responsive websites and apply modern techniques.

- **Working on a class Diabetes Prediction using Machine Learning system using Python:**

1. Installing Libraries (imported most common libraries used in python for machine learning such as Pandas, Seaborn, Matplotlib etc)
2. Importing Data, Missing Value, Analysis Exploratory (analytics using GUI), Data Analysis Feature Engineering

- **An innovative idea on renewable power & energy to take part in this national competition ([Bicchuron](#)):**

1. Entrepreneurship and development of entrepreneurial ecosystem with resources and creating connections with a local and global network for sustainable development.
2. Web design & development , Information Technology, ICT focuses on communication.
